BIOLOGICAL INTEGRATION MATRIX — HOW NATURE BUILT X78

FALCON

Wing sweep geometry for atmospheric dive. Zero-drag hull compression. Precision targeting from altitude. 389 km/h in terminal

STINGRAY

Wide-wing hydrodynamic form. Undulatory propulsion through any medium. Total flat-body radar invisibility. Glides without

dive — fastest living thing.

disturbing surrounding field.

SHARK

400 million years of apex predator design. Electromagnetic field detection via ampullae. Torpedo efficiency at deep range. Never sleeps. Never stops.

MANTIS SHRIMP

Strike force 10,000g acceleration — fastest strike in biology. 16 color vision channels — sees UV and polarized light. Club impact creates cavitation plasma. Helicoidal fiber armor absorbs any blow.

X78

THE BIOLOGICAL SOVEREIGN

In air — *falcon precision and velocity* — compressed dive form, swept wings, zero drag.

In water — *stingray silence and grace* — wide-body glide, no turbulence, invisible.

In space — *shark endurance and detection* — torpedo form, electromagnetic sense, never stops.

In combat — *mantis shrimp strike and armor* — plasma cavitation, 16-spectrum vision, helicoidal shell.

Four creatures. Five hundred million years of evolution. One vessel.
